

Quartz Surface Maintenance

General Cleaning

American Granite Stone & Tile LLC quartz surfaces are hard and nonporous, making them easy to clean. Use mild soap and water. For tougher stains, use a non-abrasive cleaner such as Soft Scrub® Liquid Gel with Bleach.

Note on Finishes

Honed, Concrete, and Rough finishes require more maintenance than Polished finishes. Marks like fingerprints and metal traces are more visible.

Common Household Spills

Use Soft Scrub® Liquid Gel with Bleach or a 50/50 vinegar-water solution. Rinse thoroughly with warm water and dry with a soft cloth.

Stubborn Food Stains

Apply Soft Scrub® Liquid Gel with Bleach to a damp cloth and wipe in a circular motion.

Dried Spills

Gently scrape material with a plastic putty knife, then clean with a damp cloth. Avoid abrasives.

Oil (Synthetic or Natural)

Use Soft Scrub® or Dawn soap. Let sit for 5 minutes. Avoid soaps with plant oils as they leave film.

Cosmetics

Clean with Soft Scrub® on a damp cloth, then rinse and dry.

Metal and Rust Marks

Use Bar Keepers Friend Powder only for spot cleaning. Apply gently with a damp cloth. Do not use scouring pads.

Other Stains

For glue, hard water, or blood: use Soft Scrub®, alcohol, or 50/50 vinegar-water. Rinse and dry.
